BEARINGS FOR STONE INDUSTRIES

THE KDM DIFFERENCE

DESIGN

DEVELOPMENT

PRODUCTION

SERVICES

- Bearing used in Marble Cutting Industries are often working in:
 - Harsh working conditions, due to the, - Highly erosive environment
 - Frequently contacting cooling water - Varying Shock loads - Heavy Vibration.

The amount of load induced on the bearing vary with type of Marble or Granite being cut.

KDM bearings has taken into account all these factors and have developed a special Spherical Roller bearing for the Marble Cutting Industry:

More Vibration
Resilience

Longer
Work Life

Modified
Internal Design

High Load
Carrying Capacity

New Innovative
Designed Rollers

Heavy
Duty Steel

Special
Heat Treatment

Advanced Forging Provides
Compact Internal Structure

MAINTENANCE

- Proper fitting and alignment should be taken care at the time of installing the bearing.
- Proper lubrication should be given time to time, using KDM High Performance Grease.
- Proper protection against foreign sediment particles and water should be done

BEARINGS FOR STEEL ROLLING INDUSTRY

ROUGHING STAND ROLLS

INTERMEDIATE STAND ROLLS

FINISHING STAND ROLLS

ROLLS FOR NON METAL INDUSTRIES

DEFINITE CHILLED ROLLS

INDEFINITE CHILLED ROLLS

HIGHLY ALLOYED CHILLED ROLLS

DOUBLE POURED CHILLED ROLLS
